Paper 1

October/November 2013

2 hours 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

This document consists of 20 printed pages.

* of five For iner's

- 1 Internet security is a major issue for many people. The following is a list of five security issues:
 - hacking
 - pharming
 - phishing
 - spyware
 - viruses

Choose three of these security issues. For each one, describe the security issue and suggest a way of protecting against it.
Security issue 1
Description of issue
Method of protection
Security issue 2
Description of issue
Method of protection
Security issue 3
Description of issue
Method of protection

		3 M. Day
		oile phones are communication devices. They allow communication via specific messaging. Most mobile phones offer <i>predictive texting</i> . State what is meant by this term.
(i)	Most mobile phones offer <i>predictive texting</i> .
		State what is meant by this term.
		[1]
(i	i)	What two additional functions would you expect to find on a mobile phone?
		1
		2
		[2]
		necting a USB telephone to a computer allows communication using VoIP inology.
(i)	Give one advantage of using VoIP rather than other telephone systems.
(i	i)	Give one disadvantage of using VoIP rather than other telephone systems.
ii	i)	To use VoIP, there is no need to use a USB telephone.
		What other hardware could be used to allow verbal communications?
		[0]
		[3]

- 3 A motor car manufacturer offers various combinations of
 - seat colours
 - seat materials
 - car paint colours

www.PapaCambridge.com A database was set up to help customers choose which seat and paint combinations were possible.

	car paint colours									
code	cloth	leather	seat	white	red	black	blue	green	silver	grey
			colour							
CB	Υ	N	black	Υ	Υ	Υ	Υ	Υ	Υ	Υ
LB	Ν	Υ	black	N	Υ	N	Ν	N	Υ	Υ
CC	Υ	N	cream	N	Υ	Υ	Υ	N	Z	Z
LC	Ν	Υ	cream	N	Υ	Υ	Υ	N	Z	Υ
CG	Υ	N	grey	N	Υ	Υ	Υ	Υ	Υ	Z
LG	Ν	Υ	grey	N	Υ	N	Υ	N	Υ	Υ
CR	Υ	N	red	Υ	Ν	Υ	Ν	N	Υ	Υ
LR	Ν	Υ	red	Υ	Ζ	Υ	Ν	N	Υ	Υ
CL	Υ	N	lime	N	Ν	N	Υ	N	N	Ν
LL	Ν	Υ	lime	N	N	Υ	Υ	Υ	Ν	N

(NOTE: N = no, not a possible combination, Y = yes, combination is possible)

(a)	How many records are shown in the database?
	[1]
(b)	The following search condition was entered:
	(cloth = "Y") AND (blue = "Y")
	Using code only, which records will be found?
	[2]
(c)	A customer wanted to know the possible combinations for a car with leather seats and either silver or grey paint colour.
	What search condition would need to be input?
	[2]

www.PapaCambridge.com (d) A customer decided to buy a green car. He wanted to know which seat color seat materials were not a possible combination with green paint. What search condition would he need to enter? (e) Give one advantage of using the codes Y and N in the database rather than using Yes and No. (a) Seven hardware items are shown on the right hand side in the diagram below. Three applications are shown on the left in the diagram. By drawing arrows, link each application to the appropriate hardware items (each hardware item must be used once only): speakers computer aided design (CAD) light pen microphone video conferencing spaceball data goggles webcam virtual reality data gloves [3] (b) Name one additional item of hardware used in each of the three applications named in the above diagram. video conferencing ----virtual reality

5 Study the following flowchart very carefully.

(i)
$$a = 5, b = 4, c = 1, d = 9$$

(ii)
$$a = 5, b = 9, c = 4, d = 1$$

www.PapaCambridge.com 15 A library uses barcodes to identify borrowers and books. A borrower has a card cona barcode with an equivalent numerical code. Each book also has a barcode with equivalent numerical code.

The flowchart on the facing page shows what happens when book(s) are taken out by a borrower. However, several stages are missing.

Using item numbers only, complete the flowchart by selecting stages from the item list below.

Item List

Item Number	Item Description					
1	any more books to scan?					
2	has book's barcode been recognised?					
3	has book's numeric code been recognised?					
4	has borrower's barcode been recognised?					
5	has borrower's numeric code been recognised?					
6	input book's numeric code manually					
7	input borrower's numeric code manually					
8	scan in barcode shown in book					
9	update borrower and book files					

16 (a) A greenhouse is being monitored by a computer using 2 sensors. SENSOR1 method the temperature and SENSOR2 measures oxygen levels.

DR1 me For iner's then an error

If the temperature exceeds 45°C or oxygen levels fall below 0.19, then an error message is output by the computer.

Write an algorithm, using pseudocode or flowchart only, which

- inputs both sensor readings
- checks the sensor input values and outputs a warning message if either are out of range
- continues monitoring until the <ESCAPE> key is pressed

	(You may assume that READ SENSOR <i>n</i> will take a reading from SENSOR <i>n</i> and that READ KEY inputs a key press from the keyboard).
	[5]
(b)	Describe why a DAC (digital to analogue converter) would be needed if the computer is used to control the greenhouse environment.
	[2]
