Assignment #3

Q. Draw a flowchart for the given scenario
A Company has 50 employees. Their monthly salary is calculated as per given table

Designation	House Allowance
Clerk	10 %
Supervisor	15%
Manager	20%
Others	5%

Note: Where "Others" is not a specific designation but refers any other designation than the specified one.

Refer your notes and do the following task

Tasks:

1. Take salary and designation as input for all employees in arrays.
2. Calculate the house allowance as per their designation in another array
3. Calculate the net salary (Salary + house allowance) in an array
4. Display the net salary at the end along with the name of employee

Note: Submit this assignment by Monday. Complete the previous two assignments also and submit them all by Monday otherwise 0 mark will be awarded to the failure.
